❖ Duration	:	30 Hours
❖ Program Coordinator:		Mr. Vinod Mule
❖ Program advisor	:	Dr. Vijay A. Jagtap

Introduction –

The College has various Add-On Certificate Courses which have been started with the aim of enhancing and enriching the students learning experience in the College and to bring about a more holistic approach to learning as well as to cultivate and develop the necessary skills for various vocations and careers

This course is designed to provide participants with the knowledge to administer basic first aid and/or CPR/AED (Automated External Defibrillator) during emergency situations. An emphasis will be placed on confidentiality, blood borne pathogens, personal protective equipment (PPE) and hand washing techniques, and safety procedures in chemical, radiation and fire situations.

Current studies show that there is a significant lack of knowledge regarding the typical signs and risk factors associated with serious medical conditions among pharma students and laypersons. Basic life support and first aid consists of a number of medical procedures provided to patients with life threatening conditions of the body that cause pain or dysfunction to the person.

Understanding BLS courses and more than that, practicing these techniques is by far the most challenging task confronting first aid. Taking everything into consideration, we believe that an adequate education in first aid and basic life support should be considered an essential aspect of the curriculum. The course is video-based and includes extensive peer and mannequin practice augmented with case discussions. First aid procedures will be included. Upon successful completion of this add-on course: Basic Life Support and First Aid, participants will get certificate from institute

Course Objectives/Outcomes:

The objective of this course is student will be able to acquire knowledge and demonstrate skill in providing First Aid treatment in emergencies that may be met in any settings and to enable the student to:

- 1) Demonstrate basic first aid skills needed to control bleeding and immobilize injuries.
- 2) Demonstrate the skill needed to assess the ill or injured person.
- 3) Demonstrate skills to assess and manage foreign body airway obstruction in infants, children and adults.
- 4) Demonstrate skills to provide one- and two- person cardiopulmonary resuscitation to infants, children and adults.
- 5) Recall rationale and technique for automated external defibrillation.
- 6) Demonstrate proper use of pocket mask, bag-valve mask and ventilation to an artificial airway during resuscitation attempts
- 7) Understand his/her role in disaster preparedness and management

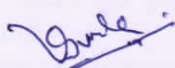

About the program: -

Department of Pharmacology of Yashwantrao Bhonsale College of Pharmacy had organized add on course from 18/07/2016 to 23/08/2016 on the topic **“Basic Life Support & First Aid”** for S.Y. B. Pharm; SEM-III students. The syllabus was designed in the view of the students’ perspective & the need towards professional& educational skills
