“SEMINAR ON CAREER PROSPECT IN CLINICAL RESEARCH AND REQUIREMENT”

Glimpses of training seminar on "Career Prospect in Clinical Research and Requirement" by Operation Head Mr. Vishal Chaudhari, Clini India, Pune" It is well known that effective relevant training plays an essential role in overall career development. In very specialized industries such as clinical research, obtaining the right knowledge and building the right attitude is of immense importance. Apart from knowledge equal importance is given to determine the different levels of training needed for various functional levels of clinical research professionals. At the level of a Clinical Research Associate (CRA), an individual is required to have good working knowledge of ICH GCP guidelines and the applicable regulations issued by various regulatory authorities to perform clinical trials in an ethical way. Many institutes and training providers are offering training programs related to clinical research for over a decade. While most of these programs are carried at Clini India, study coordinators and trial managers, they have now also got extended to fields such as medical writing, pharmacovigilance and clinical data management." said by Mr. Vishal Chaudhari. TPO cell organized session in the presence of Hon. Principal Dr. Vijay Jagtap. TPO Head Mr. Sanket Gandhi took efforts to make program successful.
