**Company profile:** At **BASF**, create chemistry for a sustainable future. BASF combine economic success with environmental protection and social responsibility. BASF has successfully partnered India's progress for over 127 years. In 2019, BASF India Limited, the flagship company of BASF in India, celebrates 75 years of incorporation in the country. BASF India generated sales of around €1.4 billion.

BASF and its Group companies maintain key production sites at Dahej, Mangalore, Ankleshwar, Thane and Chennai 2. The Mangalore site is BASF's largest manufacturing site in South Asia (in terms of area). BASF maintains two R&D centers in India, in Mumbai and Mangalore, which are part of BASF's global technology platform. Thane branch is popular for Engineering Plastics, Coolants, Polyurethanes, Textile & Leather Auxiliaries, Care Chemicals and Construction Chemicals, serving key customers in the northern and western markets.

#### **OVERVIEW:**

This program has been conducted by the **Pune Knowledge Cluster (PKC)** and is supported by **BASF Chemicals India Pvt. Ltd.**, under their Corporate Social Responsibility (CSR) funding program. For the official launch of the WENyan program they organised an event on the 6th and 7th of February 2023 which required the physical engagement of all the students awarded this scholarship.

**Eternis Fine Chemicals LTD.**, inaugurated the Occupational Health Center Building at the Kurkumbh manufacturing facility near Pune, Maharashtra. This building is a new addition to the complex which will house the health & safety department, administrative block, and employee canteen spread across three floors. Inclusion of this facility reinforces Eternis' corporate strategy and vision towards business growth and expansion.

**BASF INDIALTD** is Retailer of Cement, Chemical, Concrete Admixture, Pharmaceutical from Navi Mumbai, Maharashtra. In March 2017, BASF inaugurated its Innovation Campus in Navi Mumbai. The Innovation Campus Mumbai is the second largest R&D site in Asia Pacific and will host global research activities and regional and local development activities. Development activities will serve BASF's Performance Chemicals, Care Chemicals, and Pigments & Dispersions businesses. By combining development activities with global

research, the campus fosters exchange of know-how and ideas about latest technologies and methods, ensure access to state-of-the-art equipment, and create synergies. The site can accommodate up to 300 scientists in the future (approximately 120 as of the end of 2017).
