SAMANT**
DLLE EXTENSION
TEACHER

Objective :

1. To beautify the areas for scenic beauty.
2. To plant trees.

About this activity: the purpose of tree plantation is to save endangered environment and beautify our life. Trees are valuable gifts of nature. they are known as best friends of human beings.

The tree is the key to a pollution-free environment for along time because they are responsible for providing oxygen,improving the quality of air,climate amelioration, conserving water, soil preservation, and supporting wildlife. Due to all these reasons, tree plantation has become necessary in the present scenario as pollution is at a peak. Tree plantation is the only way to control pollution to some extent.

As a small step from our side we the students of Yashwantrao Bhonsale College of Pharmacy, Sawantwadi organized a DLLE's community level activity i.e. tree plantation under the guidance of Hon. Dr. Vijay Jagtap sir, Principle of Yashwantrao Bhonsale College of Pharmacy, Hon. Ms. Rashami Mahabal ma'am, Ms. Sheetal Samant, extension teacher.

On 8th December 2022 we conducted this activity at Shiroda. Trees are an investment. How well that investment grows depends on several factors including, the type of tree planted, its location and the care provided. Getting your new tree off to a healthy start will help the tree mature to its full size and ensures it's will provide environmental, economic, and social benefits throughout its life time.

Since all of us know that, once in the natural environment, Soil erosion is a gradual process that occurs when the impact of water or wind detache sand removes soil particles, causing the soil to deteriorate. Soil deterioration and low water quality due to erosion and surface run off have become severe problems world-wide harmful effects and influenced them by presenting slogan.

*Plant a tree, so that the next generation can get air for free.

*Protect your Earth, Protect the Greenery.

*Help the birds build a nest, plant a tree.

This slogans helps us to make our objective more clear, significant and effective to contribute to plant a tree.
