KALEIDOSCOPE

| Sr no | Participants category | Number of participants |
|-------|-----------------------|------------------------|
| 1 | Students attended | 120 |
| 2 | Speakers | 2 |
| 3 | Coordinator | 6 |
| 4 | Student in charge | 1 |
| 5 | Total | 129 |

POs attained are: -

- 1) Pharmacy knowledge.
- 2) Planning abilities.
- 3) Problem analysis.
- 4) Modern tool usage.
- 5) Leadership skills.
- 6) Professional identity.
- 7) Pharmaceutical ethics.
- 8) Communication skills.
- 9) Life-long learning.

KALEIDOSCOPE

Objectives:

- 1) To create a platform to learn about animal safety.
- 2) To understand the precautions to be taken while coming in contact with animals.
- 3) To identify the local species as well as wildlife species of animals.

About the program: - "Animal safety and rescue"

Nowadays, animals are on the verge of extinction. This might be due to any of the socio-environmental factors for which directly or indirectly humans are responsible. That's why in order to create a platform for students to learn about animals safety, their precautions, handling techniques, local species of animals and many more about the animal world, a seminar on animal safety and rescue was conducted.

In this seminar, the guest speakers Mr. Anil gawade and Mr. Omkar gawade briefly explained the audience about basic things of animals like their habitat, their body types and many more. They explained the differences between their body types, from which we will come to know which wildlife species the animal is. They make us understand the speciality of the animal from which its identity is known to us. They explained various handling techniques of animals and on the same side they also taught the precautions and care to be taken while handling the animals. They made us clear about the wildlife species and local species of animals.

The overall session was very fruitful and this was the initiative taken towards wildlife conservation and rescue of animals.
