Objectives :

- To create green belt and avenues for meeting aesthetic recreational needs to the people.
- To beautify the areas for scenic beauty.
- To reduce the surface run-off discharge and checking soil erosion along the embankments.
- To reduce temperature and increase humidity.
- To reduce noise pollution to the neighboring household population.
- To reduce the impacts of air pollution and dust as trees and shrubs are known to be natural sink for air pollutants.
- To provide much needed shade on glaring hot roads during summer.

About the Activity :

Plantation drive is proactive and sustainable approach to environmental conservation. Planting the trees and vegetation addresses Air, water and soil pollution . Plantation drive is a multifaceted solution to the pollution benefiting to environmental improvement . plantation drive contribute significantly to a cleaner and healthier planet , making them integral components of broader efforts to combat pollution and promote ecological balance.

Trees act as natural filters absorbing pollutants from air and releasing oxygen .They play a vital role in mitigating air pollution by capturing harmful particles and greenhouse gases. additionally their root systems contribute to the soil stability and prevent soil erosion and contamination.

They also play role in maintaining water quality .Trees and plants along water bodies act as buffers, filtering pollutants and reducing runoff that can carry contaminants into rivers and lake. On 2nd December 2023 group of 10 students conducted the plantation driveat Malgoan, Sawantwadi . Students planted the trees in the local area which would help the sustainability of environment in the area.The event was successfully completed and accomplished.
