### **Objectives:**

1. The importance of early detection of geriatric health problems for timely intervention.
2. To provide information on factors contributing to geriatric health issues, helping individuals make informed lifestyle choices.
3. To promote healthy behaviors and preventive measures to enhance the overall well-being of the elderly.
4. Raise awareness about mental health challenges in the elderly and advocate for destigmatization and support.
5. Sharing effective management and treatment strategies for common geriatric conditions.
6. Raise awareness about the need for supportive policies and services to address the unique needs of the aging population.

### **About this Activity:**

All group members decided to conduct awareness regarding Common geriatric problems and how to manage them. So every group member gather knowledge regarding the topic. On 22<sup>nd</sup> February 2024 they decide to conduct the awareness. The awareness was created by using powerpoint presentation made by themselves. Firstly, they introduced them regarding their activity. The presentation was done members enthusiastically. All of students listen to them very carefully and participated in discussion session enthusiastically. They gave the knowledge regarding the problems faced by geriatric patients. They also gave information regarding how these problems can be managed. This awareness made them realize the importance of senior citizens.
