Organ Donation Report

Introduction

Organ donation is a process in which a person willingly donates an organ of his body to another person. Furthermore, it is the process of allowing the removal of one's organ for its transplanting in another person. Organ donation can also improve the quality of life of many people. Our Indian Government framed a law to control organ commerce and encourage donation among people after brain death. As per the law, The Transplantation of Human Organs Act, 1994, any individual who wants to donate their organs needs to fill out a prescribed form on the Ministry of Health and Family Welfare of the Government of India's website.

About the Program

On Monday 31st July 2023, Yashwantrao Bhosle College of Pharmacy Sawantwadi organized a session on "A Talk on Organ Donation", Donate an Organ: Brighten One's Life. The session was held in the seminar hall of YBCP. The organizers of the session were Mr. Vinod R. Biradar, Mr. Mayuresh R. Redkar. Coordinators of NSS Cell & Sense Club YBCP & Dr. Rohan K. Barse (Head of Spandan Club YBCP). The chief guest was Dr. Lalit Kumar Vithalani (Associate Professor and HOD, Department of Kriya Sharir, B. S. Ayurvedic College Sawantwadi).

As soon as the session started at 11.00 am, NSS student representative Ms. Alia Gawandi started the session and introduce the importance of organ donation, later on Mr. Mayuresh R. Redkar addressed the chief guest and by handing a bouquet as a token of respect and after that session was delivered by the Dr. L. Vithalani sir. As the session preceded Dr. Vitthalani sie gave a lot of information about organ donation and describe the protocol of organ donation. How does organ donation work? Organ donation can occur after brain death or circulatory death. In brain death, vital functions of the donor including brain activity cease permanently. In circulatory death, the heart stops beating and resuscitation is not possible. At the end of the session students got detailed idea of the organ donation and its importance. Ms. Simran Syed, NSS student representative gave vote of thanks and concluded the session.

Conclusion:

Organ donation is a selfless and generous act, which gives hope and life to people who would otherwise face certain death. By opting for organ donation, we can leave a positive legacy that can make a significant difference in the lives of many.

As a society we must recognize the benefits of organ donation, create awareness and promote the importance of organ donation.

Total Number of Participants: 198
