Objectives :

1. Remove Trash and Debris:

Remove all visible trash, debris, and pollutants from the beach to restore its natural beauty and prevent harm to marine life.

2. Protect Marine Life:

Protect marine life, including birds, turtles, and fish, by removing hazardous materials like plastic, glass, and sharp objects that can cause harm or entanglement.

3. Promote Environmental Awareness:

Raise awareness about the impact of human activities on the marine ecosystem and promote environmental responsibility among beachgoers, local communities, and stakeholders.

4. Improve Beach Health and Safety:

Improve the overall health and safety of the beach by removing pollutants, reducing the risk of waterborne diseases, and creating a clean and safe environment for recreation and tourism.

5. Foster Community Engagement and Education:

Foster community engagement and education by involving local residents, schools, and organizations in the beach cleaning efforts, promoting environmental stewardship, and inspiring long-term behavioral change.

About the Activity :

On January 10, 2025, the DLLE Club of our college organized a beach cleaning activity at Shiroda Beach in Maharashtra. The event aimed to promote environmental awareness, protect marine life, and restore the beach's natural beauty.

Despite the modest turnout of 9 dedicated volunteers, the event was a success. The volunteers worked together to collect and dispose of trash and debris from the beach. A total of 30 kg of trash, including plastic bottles, bags, and other non-biodegradable waste, was collected and disposed of properly.

The beach cleaning activity not only helped to restore the beach's natural beauty but also raised awareness about the impact of human activities on the marine ecosystem. Volunteers removed hazardous materials like sharp objects and glass that can harm marine life.

The success of the beach cleaning activity was evident from the feedback received from participants. The volunteers expressed their satisfaction with the event and pledged to continue promoting environmental awareness and protecting the marine ecosystem.

The beach cleaning activity at Shiroda Beach demonstrated the power of community-driven initiatives, no matter how small, in promoting environmental conservation. The DLLE Club of our college looks forward to organizing more such events in the future.

Details of Participants :

No. Of Participants : 09

Glimpses of the event:
