Objectives :

- Increase Public Awareness of Mangrove Ecosystems
- Highlight the Threats to Mangrove Forests
- Support Policy Advocacy for Mangrove Protection
- Foster Collaboration Among Environmental Organization
- Promote Research and Data Collection on Mangroves
- Promote Ecotourism as a Tool for Conservation
- Promote the Restoration of Degraded Mangrove Areas

About the Activity :

Mangrove conservation is crucial for maintaining ecosystem balance and supporting biodiversity. Efforts to protect these ecosystems involve creating protected areas, such as national parks and wildlife sanctuaries. Sustainable livelihood initiatives, like eco-tourism and aquaculture, help local communities benefit from mangrove conservation. Restoration projects focus on replanting and rehabilitating degraded mangrove forests.

Education and awareness programs raise consciousness about the importance of mangrove conservation among local communities, policymakers, and the general public. Collaboration among governments, NGOs, and local stakeholders is essential for effective mangrove conservation. By working together, we can protect these vital ecosystems and ensure the long-term health of our planet. Successful conservation requires a multi-faceted approach that addresses the complex relationships between mangroves, local communities, and the environment.

On January 17, 2025 the DLLE club of our college organized a awareness program on Mangroove Conservation at Vengurla.The event aimed to promote education, research, and awareness about Mangroove , ecology, and conservation.The awareness program was promoted by utilizing social media platforms and distributing pamphlets and brochures.The activity may be small but has made a significant impact

on wildlife management. The DLLE club of our college looks forward to organizing more such events which promotes environmental conservation.

Details Of Participants : No. Of Participants : 10

Glimpses of the event:

Report prepared and approved by :
