Principal  
YBCP

## **Objectives :**

- To promote the conservation of wildlife populations, habitats, and ecosystems.
- To promote education, research, and awareness about wildlife management, ecology, and conservation.
- To support the development and implementation of policies and legislation that promote sustainable wildlife management and conservation.
- To involve local communities in wildlife management decisions and activities, and to promote coexistence with wildlife.
- To promote international cooperation and collaboration in wildlife management and conservation.
- To support community-based initiatives that promote sustainable livelihoods and reduce dependence on natural resources.
- To promote responsible and sustainable tourism practices that support wildlife conservation and local communities.

## **About the Activity :**

Wildlife management involves various activities to maintain healthy and sustainable wildlife populations, habitats, and ecosystems. Habitat management includes restoration and conservation of natural habitats, removal of invasive species, and creation of wildlife corridors. Population management involves monitoring and regulating wildlife populations through techniques like culling, relocation, and birth control measures. Research and monitoring inform management decisions, while community engagement and education promote coexistence with wildlife. Wildlife managers collaborate with governments, NGOs, and international organizations to develop policies and laws supporting conservation. They also address climate change impacts through climate-smart conservation strategies and climate-resilient habitats. Effective wildlife management ensures the long-term sustainability of wildlife populations and ecosystems, benefiting both humans and wildlife.

On January 17, 2025 the DLLE club of our college organized a awareness program om wildlife management at Sawantwadi City.The event aimed to promote education, research, and awareness about wildlife management, ecology, and conservation.The awareness program was promoted by utilizing social media platforms and distributing pamphlets and brochures.

The activity may be small but has made a significant impact on wildlife management.The DLLE club of our college looks forward to organizing more such events which promotes environmental conservation.

**Details of Participants : No. Of Participants : 10**

**Glimpses of the event:**

**Report prepared and approved by :**

**Mr. Jatin A. Tekawade**  
Event Coordinator
