Objectives :

- Educate people on the importance of preventing soil pollution to maintain soil health.
- Promote sustainable use of natural resources to reduce soil pollution.
- Raise awareness about the impact of soil pollution on ecosystems and biodiversity.
- Educate people on the health risks associated with soil pollution, such as cancer and neurological disorders.
- Promote safe farming practices to reduce soil pollution and ensure food safety.
- Raise awareness about the connection between soil pollution and water pollution.

About the Activity :

Soil pollution is a serious environmental issue that affects ecosystem, human health, and the economy. The soil pollution includes chemical pollution, physical pollution, biological pollution. The main causes that contaminate soil are agricultural activities, industrial activities, urbanization, natural disasters. The consequence and effects of soil pollution are mainly environmental impact, loss of biodiversity, human health impacts, economic impact like decreased crop yields, reduced agricultural productivity. On 23 January 2025 group of 10 students decide to spread the awareness about soil pollution with local community. The students made the interactive posters and information about awareness on reducing the soil pollution.

Students interact with people about management of soil pollution and Strategies about reducing soil pollution. The event was successfully and satisfactorily accomplished.
